Md. Mahabubul Hasan Masud
Delray Beach, FL 33445
Email: mmasudhasann@gmail.com
Phone: +1 561 699 4147

Professional Summary

❏ Around 10+ years of experience in **Frontend Application Development** using different types of application platform.
❏ Around 6+ years of experience in **Single Page Application (SPA)** development.
❏ Initially used **Backbone JS** for developing SPA application and worked around 2+ years on this framework.
❏ For last 2+ years, developing application using **AngularJS framework**. Developed 3/4 application which are under NDA.
❏ Expert as a **Frontend Developer** in **AngularJS** platform.
❏ Develop application using **REST based architecture**, where I used **Express JS (Node.js)** for writing the backend service.
❏ Develop REST service using **NodeJS.** used **Passport** authentication system for **NodeJS**. **Express** Framework is my first choice for **NodeJS** structure.
❏ **MySQL** is the database engine, which I loved most. Based on the application structure and requirements, I love to use **NoSQL (mongoDB)**.
❏ Develop application using **Symfony2 framework** for last 4+ years.
❏ Expert developer in **Codeigniter framework** for last 6+ years.
❏ Also develop application using **Zend Framework** and **Laravel Framework**.
❏ Has similar expertise in different **micro-framework like Silex, Lumen, Slim**.
❏ Expert backend developer using PHP based application framework.
❏ Love to work with CSS and mostly worked with **Twitter bootstrap and Foundation.**
❏ Has expertise with **jQueryUI framework** as well as custom CSS development
❏ Able to analysis UI/UX of any web application
❏ around 3+ years of managing application release management using **GIT, Git-flow and JIRA**
❏ Has expertise in Agile development process (**Scrum and Kanban**).
❏ Able to configure deployment process and manage application with **automatic deployment** using **Jenkins, bamboo, Teamcity, Codeship.io** etc.
❏ Able to lead any team with proper **leadership**.
❏ Always maintain proper application development life cycle like **Waterfall and SDLC** etc.
❏ able to maintain QA process and write proper test case for Testing.
❏ Able to configure **Codeception testing framework** as Acceptance Testing
❏ Nowadays, using **nightwatch** for Acceptance Testing
❏ **PHPUnit** is one of my favorite framework for writing unit test for Backend system
❏ For Front-end development, I used **Jasmine and Karma** framework.
❏ Also worked with **Java (Spring Framework)** for last 1 year.
❏ Learning **ReactJS** as a new technology in frontend development beside **AngularJS 2.0**

Professional Experience
